

Using Microsoft Copilot to access information on Advantech

Purpose: This guide shows you how to create and train an AI learning model using Microsoft Copilot Studio. With this trained model, you can ask questions about the company, and it will access the database to find the answer.

1.) Open Microsoft Copilot **Studio** and sign in with Advantech account info.

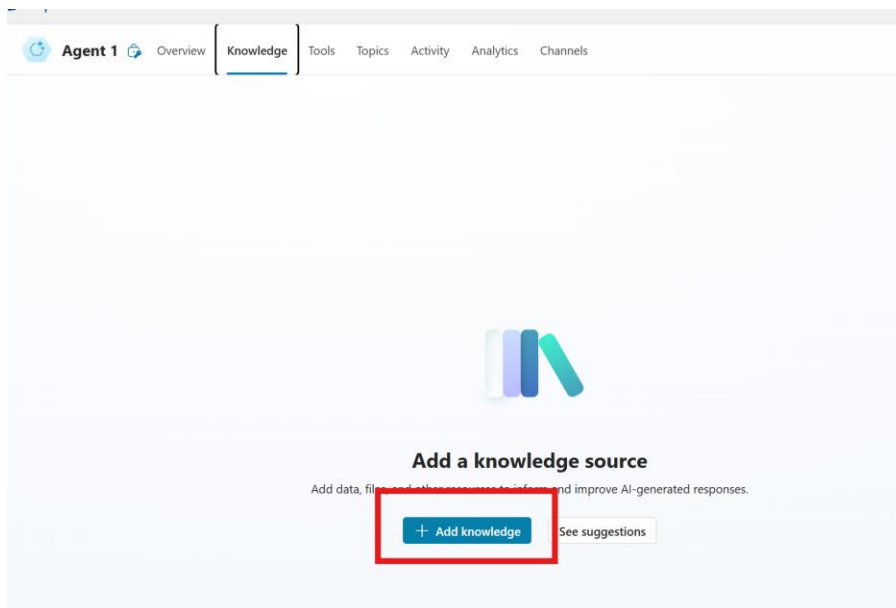

2.) Select create an agent on the left tab, then create again on the top right.

3.) Make sure to choose the correct language (that you would like your answers to be in) as you cannot change language after creating the agent. If you want your answers to be in Japanese, please choose Japanese.

4.) Click on the knowledge tab. This is where you upload files to the AI model to train it

5.) You **CANNOT** upload folders. You can only add text-based files (power point, word, pdf, etc.) So, if you want to add information from a folder, open the folder and select the text files

Name	Date modified	Type	Size
202410-SOP見直し	6/6/2025 2:06 PM	File folder	
BP	11/25/2024 2:46 PM	File folder	
ITP	2/7/2025 5:50 PM	File folder	
OSライセンス画像	1/30/2025 11:15 AM	File folder	
PIL 不動産庫設定	4/16/2025 4:44 PM	File folder	

USB Drive (E:) > SOP for katy > ITP

v folder

Name	Date modified	Type	Size
CO_MR21-Change satndard price-V2	9/12/2023 5:19 PM	Microsoft Word Doc...	905 KB
ITP Training for PM_Nicole Sun	9/15/2023 12:42 PM	Chrome HTML Docu...	7,443 KB

6.) After the files are uploaded, you can test the agent. Do this by asking a question (that refers to one of the files you added) on the right side

The screenshot shows the 'Agent' interface with a 'Knowledge' tab selected. The knowledge base contains a list of files, including SOPs and manuals, with their status (In progress or Ready). On the right, a chat window titled 'Test your agent' is open, displaying a message from the agent and a user input field.

Chat window content:

こんにちは。私は仮想アシスタントの Agent です。ご質問への回答時に必要に応じて AI を利用します。たとえば、コパイロットの作成時に Web サイトの情報を提供する場合は、その Web サイトについて質問できます。さらに、生成 AI を設定することでコパイロットにナレッジを追加することもできます。

11 分前

Ask a question or describe what you need

8/20/2024

Example) I will ask the agent “How do I create RD project code? This info is stored in the KUT-CO-IO0101A word file that I entered as knowledge.

The screenshot shows a Microsoft Word document titled 'KUT-CO-IO0101A_create RD project code'. The document content is as follows:

KO01 - Create RD project code

Accounting -> Controlling -> Internal orders
-> Master data -> Special functions -> Order
-> Create

SAP Easy Access

- Favorites
- SAP Menu
- Office
- Cross-Application Components

It will give a response based on the files given

21 分前

how do i create rd project code?

4 分前

RDプロジェクトコードの作成方法 手順

1. 内部オーダーの作成

- 経路: 会計 -> 管理会計 -> 内部オーダー -> マスターデータ -> 特別機能 -> オーダー -> 作成

○ 操作:

- オーダータイプを入力:
AD03
- プロジェクトコード、説明、会社コード
(**EU80**)、機能領域
(**0500 (R&D)**) を入力し、次の画面「一般データ」に進む ①.

2. 一般データの入力

プロジェクトコードの命名規則

- アカウントカテゴリ:
 - **RD**: NPIリリース時に使用
 - **MP**: EPIリリース後に使用
- 年コード: YY
- **MP**: 非M/Pの場合は0、M/Pの場合は1
- ビジネスグループ: EAI PG (システムによるデコード)
- 製品部門: EAI PD (システムによるデコード)
- 現在の番号: 長さ = 3 (システムによる自動生成) ②.

注意点

- プロジェクトコードの命名規則:
 - ACG BUの下にあるADLoGは、RD0900205006のように命名される
 - EPI提出後、Financeが新しいプロジェクトをリリースし、MP0900205006のように命名される ②.

この手順に従って、RDプロジェクトコードを作成することができます。

2 | Project code creation process....

- The green outline is the answer “Accounting -> Controlling -> Internal orders -> Information system -> Reports for Internal Orders -> Master Data Indexes -> Internal Orders” but in Japanese because that is what I set the language too when creating the agent
- On the bottom of the answer, it also shows what file it got the information from (KUT-CO-IO0101A)

Tips)

- You can ask agent the question in any language and the answer will be in the language you initially chose. Even if the information from the files is in another language, agent will translate it for you in the answer
- When you click the referred file, it will show the text without any pictures from the original file.
- If you would like to improve the model or learn more about it, please reference this:
