

How to access a custom-made Copilot Agent in Microsoft Teams

By Jiya Patel

Step 1: Open your Copilot Studio using copilotstudio.microsoft.com

Step 2: Click on “+1” followed by “Channels”.

Step 3: Click on the Teams icon.

Step 4: “Make the agent available to Microsoft 365 Copilot” and save.

Step 5: Press X and publish.

Step 6: Click on the Teams icon again.

Step 7 (optional): Edit the agent name/icon/other such settings and save.

Step 8: Press “See agent in Teams.”

Step 9: You can select “use web app” if you don’t have the app.

Step 10: On your Teams page/app, click “Add”. The agent should then appear on the left vertical bar. If it does not, click on the three dots and find it there.
