Education

Texas Tech University, BS in Computer Science Spring 2026

- **Coursework:** Programming Principles, Data Structures, Theory of Automata

Cornell Tech, Certificate in Artificial Intelligence and Machine Learning Spring 2026

- Selected for a year-long program; learned real-world applications of machine learning, AI, data science, and industry collaboration.

Experience

Field Application Engineer Intern, Advantech – Tokyo, Japan May 2025 – July 2025

- Supported integration of embedded and industrial computing systems across Windows and Linux platforms.
- Gained hands-on experience in Linux CLI, hardware monitoring, and API/SDK development using C/C++
- Worked with GPIO, SMBus/I²C protocols and electronic circuit signal measurement.
- Participated in edge AI and IoT product deployment and cloud integrations using Microsoft Azure.

Freelance Full-Stack Web Developer February 2025 – Present

- Developed custom websites for clients, including authors and businesses, focusing on UI/UX, performance, and SEO.
- Implemented full-stack solutions using JavaScript (React.js, Node.js), HTML/CSS, Tailwind CSS, and SQL/NoSQL databases.
- Built e-commerce functionality, integrating Stripe, PayPal, and Shopify/WooCommerce APIs.
- Deployed and manage cloud hosting solutions on AWS, Vercel, and DigitalOcean.

Student Analyst > Technician > Supervisor, IT Help Central at Texas Tech University – Lubbock, Tx February 2024 – Present

- Progressed through multiple roles, demonstrating leadership, technical expertise, and adaptability.
- Consistently received the highest volume of positive customer feedback by a large margin, leading to the adoption of the support methods I implemented as a structural improvement.
- Managed teams across multiple locations, optimizing workflow efficiency and ensuring high service quality.
- Assisted in training and mentoring staff, handling escalation protocols, and enforcing IT policies.

Projects

Research Paper Over the Ethics of AI use in Hiring Practices

- Examined AI's impact on hiring biases, transparency, and accountability.
- Demonstrated proficiency in technical, ethical and interdisciplinary analysis, leading to a letter of recommendation.

Raspberry Pi Maze-Solving Robot

- Developed and programmed a robot in python for maze-solving using sensors and algorithms.

Skills

- Programming Languages: Python, C, C++, JavaScript (React, Node.js), HTML, CSS
- Libraries/Frameworks: NumPy, Pandas, Matplotlib, Tailwind CSS, Express.js
- Web Development: Full-Stack Development, UI/UX, SEO, WordPress, Shopify, APIs
- Database Cloud: MySQL, PostgreSQL, MongoDB, AWS, Firebase, Vercel, Azure
- Other Skills: Cybersecurity Practices, E-commerce Integration, Technical Writing, Project Management, Leadership, Problem Solving
